

Release Note for Vigor2767 Series

Firmware Version:	5.3.7.1
Release Type:	Important – Review release notes and upgrade if the changes affect your system stability, performance, or security
Applied Models:	Vigor2767, Vigor2767ax

Vigor2767, a single-WAN VPN router, is suitable for speed-wanted customers. With high throughput performance and secured broadband connectivity provided by Vigor2767, you can simultaneously engage these bandwidth-intensive applications, such as high-definition multimedia content, online music, movie streaming and file sharing.

New Features

- Support Threat Protection – Sentry, our new license-based Cybersecurity solution.

Improvement

- Corrected: An issue with system reboot due to unexpected error.
- Corrected: Issues with displaying web pages correctly on the VigorACS server.

Known Issue

- None.

File and Modem Code

- "Vigor2767_v5.3.7.1.zip" provides modem code 5.16.19.0.

Note

- Please ensure that you use the ".rst" firmware file when recovering the router. Note that uploading the ".rst" file will reset the router to factory default settings.
For certain models, a separate ".rst" (reset) firmware file may not be provided. If the ".rst" version is not available, please manually rename the file extension of the ".all" or ".sfw" firmware file to ".rst" to create an equivalent RST firmware file.
Example:
Rename Vigorxxx_1.2.3.4.sfw → Vigorxxx_1.2.3.4.rst
Please ensure you back up your configuration before applying a ".rst" firmware, as all settings will be erased during the process.
