Release Note for VigorSwitch P1281x

Firmware Version:	2.9.9
Loader Version:	3.5.4
Release Type:	Regular – Upgrade recommended when convenient, as it includes general improvements and optimizations
Applied Models:	VigorSwitch P1281x

VigorSwitch P1281x, a PoE Gigabit Ports Web Smart Switch with 24 Gigabit Ports + 4 SFP Ports, is a standard switch that meets both IEEE 802.3u/ab Fast Ethernet and Gigabit Ethernet specifications.

New Features

- None.

Improvement

- Corrected: A display error in Port Setup where fiber ports were shown as Ethernet.
- Corrected: An issue with the syslog format preventing VigorACS from collecting logs correctly.
- Corrected: An issue where Loop Protection could not be configured for LAG ports in the Web UI.
- Corrected: An issue where EEE was enabled by default but displayed as "Disabled" in the Web UI.
- Corrected: An issue where the WUI PoE Alert indicator did not turn off after PoE usage normalized.
- Corrected: An issue where the System Log filter displayed all information regardless of the selected filter.
- Corrected: An issue that writing an empty port description profile in Central Management would not clear the existing settings on the switch.

Known Issue

- None.

Note

- STP (Spanning Tree Protocol) is enabled by default starting from firmware version 2.9.8, which may result in a slightly longer link-up time for ports.
