

Release Note for VigorAP 903

Firmware Version:	1.4.3
Release Type:	Normal
Applied Models:	VigorAP 903

VigorAP 903 is 11ac Wave 2 dual-band wireless mesh access point with a 5-port LAN switch, which port A1 supports 802.3at PoE-In. It provides the flexibility and advanced features for professional users to take full management of the wireless network, including the mesh technology, which aims for providing an easy way to expand the wireless network in minutes.

New Features

- Add master AP group ID and group key.
- Add the default DHCP client ID for identifying VigorAP.

Improvement

- Improved: Support AP management using SSH.
- Improved: Improvements for Config backup/restore and Firmware Upgrade.
- Improved: Support "AutoSelect" for the 2.4GHz channel as the default setting.
- Improved: Add a note to remind the user that the system will reboot after finishing the firmware upgrade.
- Improved: Add a note and a pop-up alert to notify the user not to enable Management VLAN when using the Mesh function.
- Corrected: An issue of changing IP when enabling Management VLAN.
- Corrected: An issue of broadcasting WiFi by using WPA3/WPA2 Personal mode.
- Corrected: A display issue of schedule status indicator if Daylight Saving was enabled.
- Corrected: An issue of setting special characters on the Device Object configuration file.
- Corrected: An issue of login device by using the admin password (set with special character "&").

Known Issue

- None.
